160	Iraq	1.9	3	1.6 - 2.1
160	Myanmar	1.9	3	1.8 - 2.3
163	Haiti	1.8	3	1.7 - 1.8

Explanatory notes*

* **CPI Score** relates to perceptions of the degree of corruption as seen by business people and country analysts, and ranges between 10 (highly clean) and 0 (highly corrupt).

** **Confidence range** provides a range of possible values of the CPI score. This reflects how a country's score may vary, depending on measurement precision. Nominally, with 5 percent probability the score is above this range and with another 5 percent it is below. However, particularly when only few sources are available, an unbiased estimate of the mean coverage probability is lower than the nominal value of 90%.

*** **Surveys used** refers to the number of surveys that assessed a country's performance. 12 surveys and expert assessment were used and at least 3 were required for a country to be included in the CPI.
